

RFQ – General Architectural and Engineering Design Services Questions

1. Would the County like to see a full Architecture and Engineering team listed, including consultants that we would potentially work with on projects (such as audio/visual)?
 - a. Yes, we would like to see any staff that would work on the project, including consultants in specialized fields.

2. The first page of the RFQ notes under #2, Technical Experience: "List experience with diverse types of facilities" and the Rating Form on page 3 specifies "Conference Center Experience" and "AV and Data Project Experience." Would the County prefer to see examples focused on Conference Centers and AV/Data projects, or a wider variety of relevant project types? Some clarification here would be helpful.
 - a. Our focus would be on Conference Center and General Office Space projects. There will be both in this opportunity.

3. Is there a particular time that the building/office will close? Any particular delivery instructions?
 - a. The deadline is Monday the 14th at 10am. Friday is a County holiday and the building is closed. Submissions can be delivered Thursday or Monday. The receptionist on the first floor will receive your submission.
