## NOTES TO USERS

This map is for use in administering the National Flood Insurance Program. It does not necessarily identify all areas subject to flooding, particularly from local drainage sources of small size. The community map repository should be consulted for possible updated or additional flood hazard information.

be consulted for possible updated or additional food hazard information. To obtain more detailed information in areas where Base Proof Elevations (BFEs) and/or floodways have been determined, users are encouraged to consult the Flood Profess and Floodway Data and/or Summary of Silvavier Elevations tables contained within the Flood Insurance Study (FIG) report the FIGN represent rounded whole-other development. The FIGN represent rounded whole-other development of the flood represent on the FIGN represent rounded whole-other development. But the solid source of flood elevation information. Accordingly, flood elevation data presented in the FIGN report should be utilized in conjunction with the FIGN for propose of construction ander floods in the solid source of constructions ander floods in the solid source of the solid sourc

Coastal Base Flood Elevrisons shown on this map, apply only individual of tool horner American Datum or 1988 (NAVDBS). Users of this FIRM should be aware that coastal flood elevations are also provided in the Summary of Sithwater Elevations table in the Flood Insurance Subyle specif for this justice, Sithwater Elevation stable in the Tool Insurance Subyle specif for this justice, construction and/or floodplain management purposes when they are higher than the elevations shown on the FIRM.

Boundaries of the floodways were computed at cross sections and interrolated between cross sections. The floodway were based on hydraulic considerations with regard to requirements of the floodway widths and other perfinent floodway data are provided in the Flood insurance Study report for the jurisdiction.

Certain areas not in Special Flood Hazard Areas may be protected by flood control structures. Neter to Section 2.4 "Flood Protection Measures" of the Flood Insurance Study report for information on flood control structures for this jurisdiction.

use particulation. used in the preparation of this map was Onio State Date Science 500 (FIRSZOR) EASO. The hostocated attam was Nois State Date Science 500 (FIRSZOR) EASO. The hostocated attam was Noise. Differences in datum, spheroid, projection or state plane zones used in the production of FIRMs for adjoined jurisdictions may result in significant positional differences in map features across jurisdiction boundaries. These differences do not affect the accuracy of this FIRM of the disposition of the date of the da

Flood elevations on this map are referred to the North American Vertical Datum of 1988. These flood elevations must be compared to structure and ground elevations referenced to the same vertical datum. For information regarding conversion between the National Coccede Vertical Datum of 1929 and the North American Vertical Datum of 1929, with the National Glocotic Survey with fellowing softens; survey at the following address.

NGS Information Services NOAA, N/NGS12 National Geodetic Survey National Geodetic Survey SSMC-3, #9202 SINC-3 East-West Highway Silver Spring, Maryland 20910-3282 (301) 713-3242

To obtain current elevation, description, and/or location information for bench marks shown on this map, please contact the Information Services Branch of the National Geodetic Survey at (301) 713-3242, or visit its website at http://www.ngs.noaa.gov/.

Base map information on this FIRM was provided in digital format by the Fairfield County, GIS Department. This information was produced from aerial photography dated 2006 or later.

Corporate limits shown on this map are based on the best data available at the time of publication. Because changes due to annexations or de-annexations may have occurred after this map was published, map users should contact appropriate community officials to verify current corporate limit locations.

Please refer to the separately printed Map Index for an overview map of the county showing the layout of map panels; community map repository addresses; and a Listing of Communities table containing National Flood insurance Program dates for each community as well as a listing of the panels on which each community is accounted.

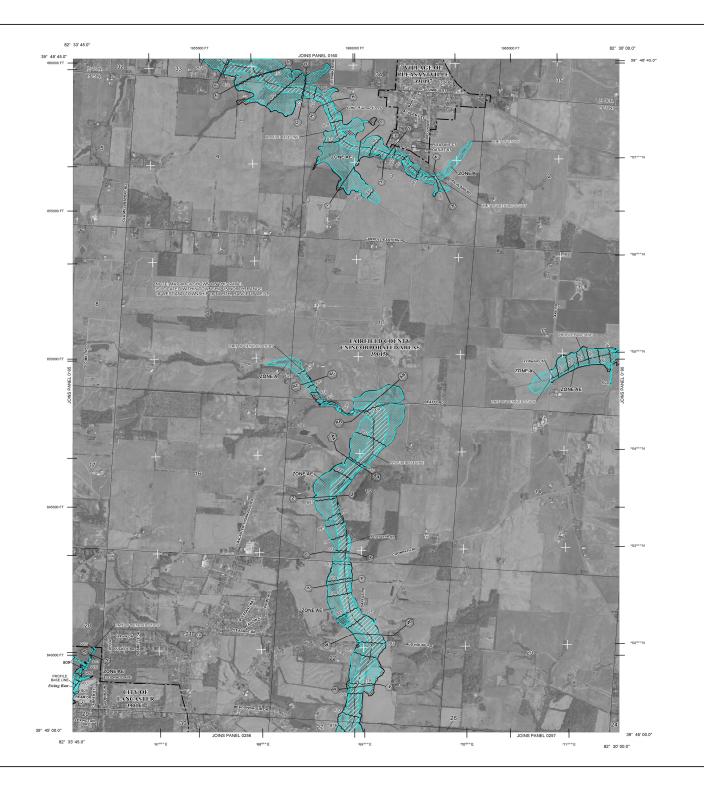

Contact the FEMA Map Service Center (MSC) via the FEMA Map Information exchange (FMIX) at 467-328-2207 for information on available products of the FEMA Map Information on available products of Map Change, a Flood Insurance Study Report, and/or rigidal versions of this map. The MSC may also be reached by Fax at 1-900-359-9020 and its website of the Map Change.

If you have questions about this map or questions concerning the Nationa Flood Insurance Program in general, please call 1-877-FEMA-MAP (1-877-338-2627) or visit the FEMA website at http://www.fema.gov/business/nfip/.

The **profile base lines** depicted on this map represent the hydraulic modeling baselines that match the flood profiles in the FIS report. As a result of improved topographic date, the "profile base line", in some cases, may deviate significantly from the channel conterline or appear outside the SFHA.

## **PANEL INDEX**

## LEGEND

SPECIAL FLOOD HAZARD AREAS SUBJECT TO INUNDATION BY THE 1% ANNUAL CHANCE FLOOD

in chance flood (100 year flood), also known as the base flood, is chance of being equiled or exceeded in any given year. "es is the area subject to flooding by the 1% annual chance file heterard may include Zones A, RE, AH, AD, AR, AP, 9P, 9, Y, and YE, is the water-surface elevation of the 1% annual chance for ZONE A

No Base Flood Elevations determined.

ZONE AE Flood depths of 1 to 3 feet (usually areas of ponding); Base Flood Elevations determined.

Flood depths of 1 to 3 feet (usually sheet flow on sloping terrain); average depths determined. For areas of alluvial fan flooding, velocities also determined. ZONE AO

ZONE A99 Area to be protected from 1% annual chance flood event by a Federa flood protection system under construction; no Base Flood Elevations

Coastal flood zone with velocity hazard (wave-action); no Base Flood Elevations determined.

ZONE VE Coastal flood zone with velocity hazard (wave action); Base Flood Blevation determined

ZUNE D

ZONE X

OTHER AREAS

Areas determined to be outside of the 0.2% annual chance floodplain.

Areas in which flood hazards are undetermined, but possible COASTAL BARRIER RESOURCES SYSTEM (CBRS) AREAS

OTHERWISE PROTECTED AREAS (OPAS)

CBRS areas and CPAs are normally located within or adjacent to Special Flood Hazard Areas 1% annual chance floodplain boundary

0.2% annual chance floodplain boundary Zone D boundary

Boundary dividing Special Flood Hazard Areas of different Base Flood Elevations, flood depths or flood velocities. Base Flood Elevation line and value; elevation in feet\*

Base Flood Elevation value where uniform within zone (EL 10)

wican Vertical Datum of 1988 Referenced to the North

Cross section line

Geographic coordinates referenced to the North American Datum of 1983 (NAD 83), Western Hemisphere 4587000 M 1000-meter Universal Transverse Mercator grid values, zone 1
