NOTES TO USER

This map is for use in administering the National Flood Insurance Program. It does not necessarily identify all areas subject to flooding, particularly from local drainage sources of small size, or all planimetric features outside Special Flood Hazard Areas. Boundaries of the floodways were computed at cross sections and interpolated between cross sections. The floodways were based on hydraulic considerations with regard to requirements of the Federal Emergency Management Agency. Floodway widths in some areas may be too narrow to show to scale. Refer to Floodway Data Table where floodway width is shown at 1/20 inch. Corporate limits shown are current as of the date of this map. The user should contact appropriate community officials to determine if corporate limits have changed subsequent to the issuance of this map. For adjoining panels, see separately printed Map Index.

ELEVATION REFERENCE MARKS

REFERENCE MARK	ELEVATION FEET (NGVD)	DESCRIPTION OF LOCATION
RM 1	960.16	Chiseled square on southwest corner of north curb of State Route 204 bridge over Poplar Creek.
RM 2	940.70	Top of concrete used to set a destroyed U.S. Geological Survey benchmark on southwest wingwall of abandoned covered bridge over Poplar Creek on Poplar Creek Road, about 0.4 mile south of the intersection of Poplar Creek Road and State Route 204.
